JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Activation parameters
Studies of the temperature dependence of charge propagation rates in quaternized poly(4-vinylpyridine) polymers containing electrostatically bound and coordinated redox sites (Sharp, Larsson) 189
Active–passive transition
The effect of a sinusoidal potential perturbation on the active–passive transition region of cobalt in a phosphoric acid solution (Pagitsas, Sazou) 89
Ad-atoms
Electrochemical quartz crystal microbalance study of silver ad-atoms on highly ordered Au(111) electrodes in sulfuric acid (Uchida et al.) 261
Alkali metal solutions
The absorption of hydrogen and deuterium in thin palladium electrodes. Part III: The influence of solution composition (Czerwiński et al.) 207
Anodic growth
Combined Raman and photoelectrochemical imaging system. Application to TiO_2 films grown anodically on Ti–Ag alloy (Ajito et al.) 229
Apparent diffusion coefficient
The determination of the apparent diffusion coefficient of HCl in Nafion®-117 and polypyrrole + Nafion®-117 by simple potential measurements (Schwitzgebel, Endres) 11

Basal-plane surface
Lithium intercalation/deintercalation behavior of basal and edge planes of highly oriented pyrolytic graphite and graphite powder (Tran, Kinoshita) 221
Biochemically modified electrodes
Improved model of a polypyrrole glucose oxidase modified electrode (Gros, Bergel) 65

Cadmium telluride
Photoeffects during cathodic electrodeposition of CdTe (Sugimoto, Peter) 183
Cation-exchange membranes
Electrotransport of proton and divalent cations through modified cation-exchange membranes (Chapotot et al.) 25
Charge propagation rates
Studies of the temperature dependence of charge propagation rates in quaternized poly(4-vinylpyridine) polymers containing electrostatically bound and coordinated redox sites (Sharp, Larsson) 189
Chloride solution
Some new photoelectrochemical insights in the corrosion–passivation processes of copper in aqueous chloride solution under open-circuit conditions (Sutter et al.) 101
Chronopotentiometry
The determination of the apparent diffusion coefficient of HCl in Nafion®-117 and polypyrrole + Nafion®-117 by simple potential measurements (Schwitzgebel, Endres) 11
CO adsorption
Effects of adsorbed CO on hydrogen ionization and CO oxidation reactions at Pt single-crystal electrodes in acidic solution (Kita et al.) 197
Cobalt electrode
The effect of a sinusoidal potential perturbation on the active–passive transition region of cobalt in a phosphoric acid solution (Pagitsas, Sazou) 89
Cobalt phthalocyanine
Spectroscopic investigations of polymer-modified electrodes containing cobalt phthalocyanine: application to the study of oxygen reduction at such electrodes (Coutanceau et al.) 173
CO oxidation
Effects of adsorbed CO on hydrogen ionization and CO oxidation reactions at Pt single-crystal electrodes in acidic solution (Kita et al.) 197
Copper
Some new photoelectrochemical insights in the corrosion–passivation processes of copper in aqueous chloride solution under open-circuit conditions (Sutter et al.) 101
The vermiculite-modified carbon paste electrode as a model system for preconcentrating mono- and divalent cations (Kalcher et al.) 149
Copper electrochemistry
Potential dependence of the optical properties of the copper|aqueous borax interface (Ceré et al.) 165
Corrosion–passivation
Some new photoelectrochemical insights in the corrosion–passivation processes of copper in aqueous chloride solution under open-circuit conditions (Sutter et al.) 101
Cuprous ions
Electropreparation of polyaniline in the presence of anhydrous cuprous ions in acetonitrile (Pekmez, Yıldız) 121
Cuprous oxide
Potential dependence of the optical properties of the copper|aqueous borax interface (Ceré et al.) 165

Deintercalation
Lithium intercalation/deintercalation behavior of basal and edge planes of highly oriented pyrolytic graphite and graphite powder (Tran, Kinoshita) 221
Deuterium sorption
The absorption of hydrogen and deuterium in thin palladium electrodes. Part III: The influence of solution composition (Czerwiński et al.) 207
Dielectric data
Maximum entropy deconvolution of dielectric and impedance data (VanderNoot) 57
Distributed systems
Maximum entropy deconvolution of dielectric and impedance data (VanderNoot) 57

Electrochemical reduction
Electrochemical reduction of high pressure carbon dioxide on Fe electrodes at large current density (Hara et al.) 257

Electron transfer
Mediated electron transfer across Nafion® | solution interfaces. Comparison with Marcus theory for cases involving Gaussian arrays of mediator couples (Sabatani, Anson) 111
Electrotransport
Electrotransport of proton and divalent cations through modified cation-exchange membranes (Chapotot et al.) 25
Ellipsometry
Potential dependence of the optical properties of the copper | aqueous borax interface (Ceré et al.) 165
Enzyme adsorption
Improved model of a polypyrrole glucose oxidase modified electrode (Gros, Bergel) 65
EQCM
EQCM monitoring of charge transport processes in polyaniline films doped with 12-silicomolybdic heteropolyanion (Keita et al.) 245

Fe(II)
The study of electrode processes of Fe(II)–thiosulphate complexes on mercury electrodes (Winkler, Krogulec) 127
Fourier transform infrared spectrometry
In situ Fourier transform infrared study of the electrochemical hydrodimerization of formaldehyde (Doherty et al.) 39
FTIR
Electrochemistry and in-situ IR microspectroelectrochemistry in a versatile thin layer reflection Fourier transform IR microspectroelectrochemical cell (Li, Lin) 83

Glucose
Electrochemical oxidation of glucose by Pt/WO_3 electrode (Zhang et al.) 241
Gold
The surface state and the potential of zero charge of gold (100): a further assessment (Hamelin) 1
Gold electrodes
Thionine self-assembly on polyoriented gold and sulphur-modified gold electrodes (Clavilier et al.) 157

H adsorption
The reversibility and overlapping of hydrogen and oxygen adsorption in the "double-layer" region of rhodized electrodes in H_2SO_4 solutions (the decomposition of water molecules on rhodium surfaces) (Wasberg, Horányi) 213
HCl
The determination of the apparent diffusion coefficient of HCl in Nafion®-117 and polypyrrole + Nafion®-117 by simple potential measurements (Schwitzgebel, Endres) 11
High pressure carbon dioxide
Electrochemical reduction of high pressure carbon dioxide on Fe electrodes at large current density (Hara et al.) 257
H ionization
Effects of adsorbed CO on hydrogen ionization and CO oxidation reactions at Pt single-crystal electrodes in acidic solution (Kita et al.) 197
Hydrogen sorption
The absorption of hydrogen and deuterium in thin palladium electrodes. Part III: The influence of solution composition (Czerwiński et al.) 207

Immiscible electrolyte solutions
A four-electrode microcell for electrochemical measurements at the interface between two immiscible electrolyte solutions (Samec et al.) 225

Intercalation
Lithium intercalation/deintercalation behavior of basal and edge planes of highly oriented pyrolytic graphite and graphite powder (Tran, Kinoshita) 221
Interface stress
Adsorbate-induced surface stress at the solid | electrolyte interface measured with an STM (Haiss, Sass) 267
Ion transfer
Linear dependence of the standard ion-transfer potentials of polyanions at the oil | water interface on the surface interaction energy and the charge (Aoki) 17

Kinetics
Electrotransport of proton and divalent cations through modified cation-exchange membranes (Chapotot et al.) 25

LIGA structures
Microstructured electrode materials in UV–visible spectroelectrochemistry (Neudeck, Dunsch) 135
Linear dependence
Linear dependence of the standard ion-transfer potentials of polyanions at the oil | water interface on the surface interaction energy and the charge (Aoki) 17

Marcus theory
Mediated electron transfer across Nafion® | solution interfaces. Comparison with Marcus theory for cases involving Gaussian arrays of mediator couples (Sabatani, Anson) 111
Mathematical models
Improved model of a polypyrrole glucose oxidase modified electrode (Gros, Bergel) 65
Mercury electrodes
The study of electrode processes of Fe(II)–thiosulphate complexes on mercury electrodes (Winkler, Krogulec) 127
Metallic substrates
Nickel electrodeposition on different metallic substrates (Gómez et al.) 45
Microspectroelectrochemistry
Electrochemistry and in-situ IR microspectroelectrochemistry in a versatile thin layer reflection Fourier transform IR microspectroelectrochemical cell (Li, Lin) 83
Microstructured electrodes
Microstructured electrode materials in UV–visible spectroelectrochemistry (Neudeck, Dunsch) 135
Modified carbon paste electrode
The vermiculite-modified carbon paste electrode as a model system for preconcentrating mono- and divalent cations (Kalcher et al.) 149
Modified polymer membranes
The determination of the apparent diffusion coefficient of HCl in Nafion®-117 and polypyrrole + Nafion®-117 by simple potential measurements (Schwitzgebel, Endres) 11

Nafion® | solution interfaces
Mediated electron transfer across Nafion® | solution interfaces. Comparison with Marcus theory for cases involving Gaussian arrays of mediator couples (Sabatani, Anson) 111
Nickel electrodeposition
Nickel electrodeposition on different metallic substrates (Gómez et al.) 45

OH adsorption
The reversibility and overlapping of hydrogen and oxygen adsorption in the "double-layer" region of rhodized electrodes in H_2SO_4 solutions (the decomposition of water molecules on rhodium surfaces) (Wasberg, Horányi) 213

Oxidation
Electrochemical oxidation of glucose by Pt/WO_3 electrode (Zhang et al.) 241
Oxygen reduction
Potential dependence of the optical properties of the copper|aqueous borax interface (Ceré et al.) 165
Spectroscopic investigations of polymer-modified electrodes containing cobalt phthalocyanine: application to the study of oxygen reduction at such electrodes (Coutanceau et al.) 173

Palladium electrodes
The absorption of hydrogen and deuterium in thin palladium electrodes. Part III: The influence of solution composition (Czerwiński et al.) 207
$PANI/SiMo_{12}$
EQCM monitoring of charge transport processes in polyaniline films doped with 12-silicomolybdic heteropolyanion (Keita et al.) 245
Phase transition
Phase transitions in thymine adlayers on silver single crystal electrodes (Hölzle et al.) 235
Photoelectrochemical imaging
Combined Raman and photoelectrochemical imaging system. Application to TiO_2 films grown anodically on Ti–Ag alloy (Ajito et al.) 229
Photoelectrochemistry
Some new photoelectrochemical insights in the corrosion–passivation processes of copper in aqueous chloride solution under open-circuit conditions (Sutter et al.) 101
Platinum electrodes
Underpotential deposition of copper on Pt(S)-[n(111) × (100)] electrodes in sulfuric acid solution (Nishihara, Nozoye) 75
Polyaniline
Electropreparation of polyaniline in the presence of anhydrous cuprous ions in acetonitrile (Pekmez, Yıldız) 121
Polyaniline films
EQCM monitoring of charge transport processes in polyaniline films doped with 12-silicomolybdic heteropolyanion (Keita et al.) 245
Polyanions
Linear dependence of the standard ion-transfer potentials of polyanions at the oil|water interface on the surface interaction energy and the charge (Aoki) 17
Polymer–modified electrodes
Spectroscopic investigations of polymer-modified electrodes containing cobalt phthalocyanine: application to the study of oxygen reduction at such electrodes (Coutanceau et al.) 173
Polypyrrole film
Improved model of a polypyrrole glucose oxidase modified electrode (Gros, Bergel) 65
Potential of zero charge
The surface state and the potential of zero charge of gold (100): a further assessment (Hamelin) 1
Potential perturbations
The effect of a sinusoidal potential perturbation on the active–passive transition region of cobalt in a phosphoric acid solution (Pagitsas, Sazou) 89
Pt electrodes
Effects of adsorbed CO on hydrogen ionization and CO oxidation reactions at Pt single-crystal electrodes in acidic solution (Kita et al.) 197

Quartz crystal
Electrochemical quartz crystal microbalance study of silver adatoms on highly ordered Au(111) electrodes in sulfuric acid (Uchida et al.) 261

Radiotracers
Electrotransport of proton and divalent cations through modified cation-exchange membranes (Chapotot et al.) 25
Raman imaging
Combined Raman and photoelectrochemical imaging system. Application to TiO_2 films grown anodically on Ti–Ag alloy (Ajito et al.) 229
Redox polymers
Studies of the temperature dependence of charge propagation rates in quaternized poly(4-vinylpyridine) polymers containing electrostatically bound and coordinated redox sites (Sharp, Larsson) 189
Reflectance spectroscopy
Potential dependence of the optical properties of the copper|aqueous borax interface (Ceré et al.) 165
Relaxation
Maximum entropy deconvolution of dielectric and impedance data (VanderNoot) 57
Rhodium electrode
The reversibility and overlapping of hydrogen and oxygen adsorption in the "double-layer" region of rhodized electrodes in H_2SO_4 solutions (the decomposition of water molecules on rhodium surfaces) (Wasberg, Horányi) 213

Self-assembled monolayers
Thionine self-assembly on polyoriented gold and sulphur-modified gold electrodes (Clavilier et al.) 157
Semiconductor properties
Some new photoelectrochemical insights in the corrosion–passivation processes of copper in aqueous chloride solution under open-circuit conditions (Sutter et al.) 101
Sensor material
Electrochemical oxidation of glucose by Pt/WO_3 electrode (Zhang et al.) 241
Silver
The vermiculite-modified carbon paste electrode as a model system for preconcentrating mono- and divalent cations (Kalcher et al.) 149
Silver single crystal electrodes
Phase transitions in thymine adlayers on silver single crystal electrodes (Hölzle et al.) 235
Solvation energy
Linear dependence of the standard ion-transfer potentials of polyanions at the oil|water interface on the surface interaction energy and the charge (Aoki) 17
Spectroelectrochemistry
Electrochemistry and in-situ IR microspectroelectrochemistry in a versatile thin layer reflection Fourier transform IR microspectroelectrochemical cell (Li, Lin) 83
Microstructured electrode materials in UV–visible spectroelectrochemistry (Neudeck, Dunsch) 135
STM
Adsorbate-induced surface stress at the solid|electrolyte interface measured with an STM (Haiss, Sass) 267
Surface structure
The surface state and the potential of zero charge of gold (100): a further assessment (Hamelin) 1
Underpotential deposition of copper on Pt(S)-[n(111) × (100)] electrodes in sulfuric acid solution (Nishihara, Nozoye) 75

Temperature dependence
Studies of the temperature dependence of charge propagation rates in quaternized poly(4-vinylpyridine) polymers containing electrostatically bound and coordinated redox sites (Sharp, Larsson) 189

Thionine
Thionine self-assembly on polyoriented gold and sulphur-modified gold electrodes (Clavilier et al.) 157
Thiosulphate
The study of electrode processes of Fe(II)–thiosulphate complexes on mercury electrodes (Winkler, Krogulec) 127
Thymine adlayers
Phase transitions in thymine adlayers on silver single crystal electrodes (Hölzle et al.) 235
Ti–Ag alloy
Combined Raman and photoelectrochemical imaging system. Application to TiO_2 films grown anodically on Ti–Ag alloy (Ajito et al.) 229
TiO_2 films
Combined Raman and photoelectrochemical imaging system. Application to TiO_2 films grown anodically on Ti–Ag alloy (Ajito et al.) 229
Unidirectional flux
Electrotransport of proton and divalent cations through modified cation-exchange membranes (Chapotot et al.) 25
Vermiculite
The vermiculite-modified carbon paste electrode as a model system for preconcentrating mono- and divalent cations (Kalcher et al.) 149
